

Audible Public Warning Systems

The most effective way to warn the public is to issue a tone followed by a clear and powerful voice message. This three step approach, ALERT, INFORM and DIRECT will eliminate confusion, restore order and, most importantly, save lives.

Floods - Bush Fires Tsunamis - Dam Breaks Shark Alerts

- Indiscriminate warning - you do not need a cell phone to be warned. Everyone within a specified area will be warned
- Wireless activation
- Battery & Solar operated units available
- Clear and effective public address broadcasting
- Clear and concise.- ALERT with a tone, INFORM and DIRECT with digitized custom voice messages.
- Voice messages can be customized for language and duration appropriate to YOUR community, with YOUR instructions
- Voice capability eliminates confusion for visitors to an area before, during and after an event
- Complete control over individual remote sites.
